October, 2018

The activity level on every tour varies depending on each individual venue and location. We do our best to evaluate the physical activity, such as walking distance, stairs etc. so that you can determine if a tour is right for you. Tours with three running shoes are the most physical and are not suitable for those with canes or walkers or limited mobility. Please ask us what is involved in a tour, if you are unsure as to your level of comfort. We need to know prior to you travelling if you have any mobility issues or dietary restrictions.

The hearts on our brochure describe the physical activity on the tour.
